

Here you have the LED wall specs:

One screen from 6mt x 4mt and 2 more panels of 1mt x 4mt

Format 4/3

Type of files jpg / .mov

in case of any problem in the preparation of the file, we can convert it to the right file.

If you don't want to use the LED wall you can still use the traditional backdrop, in that case we need the FIRE PROOF CERTIFICATE, for the backdrop or any other stage set decors you are travelling with.
